## ElecRoc 6

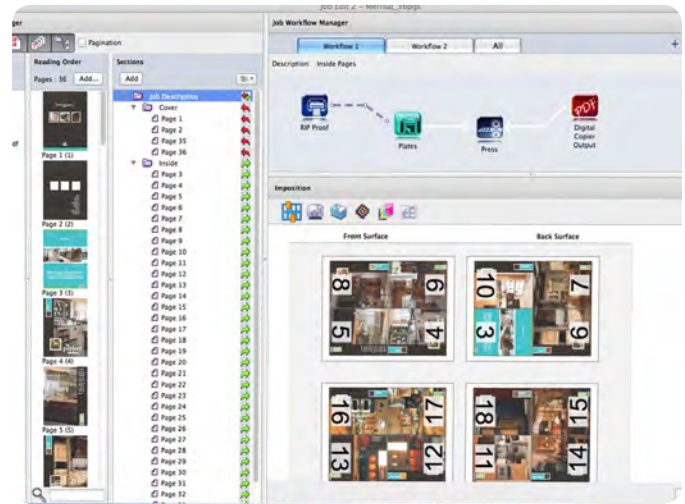

**Elecroc Workflow** is a fully integrated JDF/PDF pre-press workflow with high processing efficiency. It has user friendly interface, and it is easy to operate. Job processing is secured and file management is easy and convenient. This is a server workflow support up to 5 clients.

Scalable workflow solution designed to meet all the demands of pre-press department. It integrates the latest core technologies from Founder Electronics. ElecRoc provides all the functions required for job management, integrated preflight, trapping, imposition, PDF color management, 3D preview, EcoInk, Hi-Fi printing, PDF compare, cooperative task management, load balancing, zone screen, CIP4 ink control, advanced screening, color/screen proofing, remote proofing, and output device support. ElecRoc combines automation with process control of the entire workflow in real time.

## SIERRA

**Sierra Adobe Workflow** is built on Adobe's PDF Print Engine (APPE) with cross media functionality in mind. It's equally productive in commercial, digital, and hybrid applications with a strong feature set that includes Adobe in-RIP trapping, PDF preflighting, dynamic imposition, and advanced soft proofing in both 2D, and 3D formats.

Sierra's client-server architecture provides a simple user interface for both Mac and PC workstations, allowing operators quick access to jobs and status as they move through each step of job preparation towards final output. Imposition functionality is available to each operator without restriction to separate seat-license applications. Able to output to over 250 different output devices on today's market, Sierra offers true prepress independence® in a scalable, affordable, and complete package. Cross Media Workflow for digital, offset and hybrid applications.

JDF compliance. Work stays in Portable Document Format through each workflow step, including interpretation. PDF Preflighting and automated job correction using Enfocus Action List Library, catch design errors and automate fixes before mistakes make it to output.
